

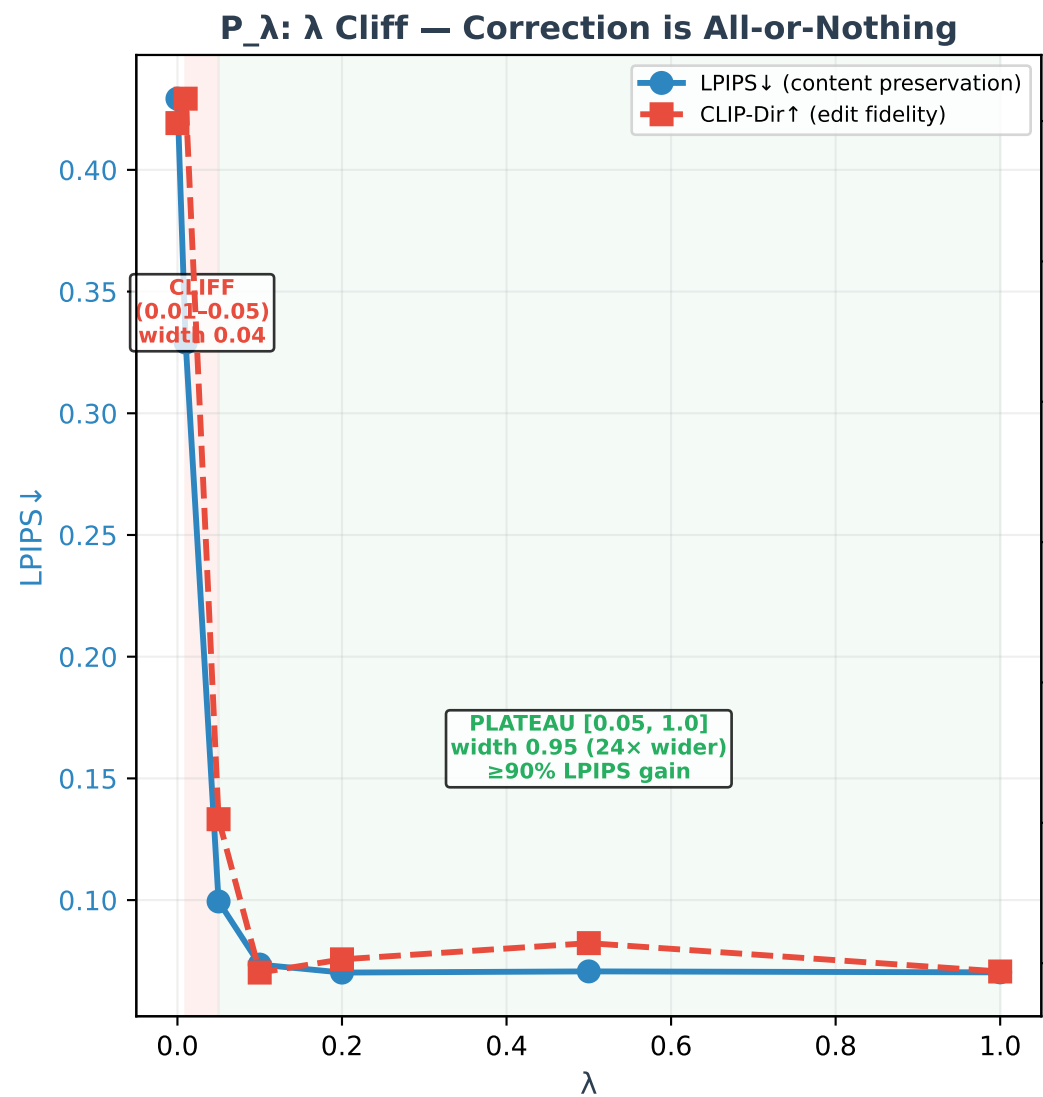

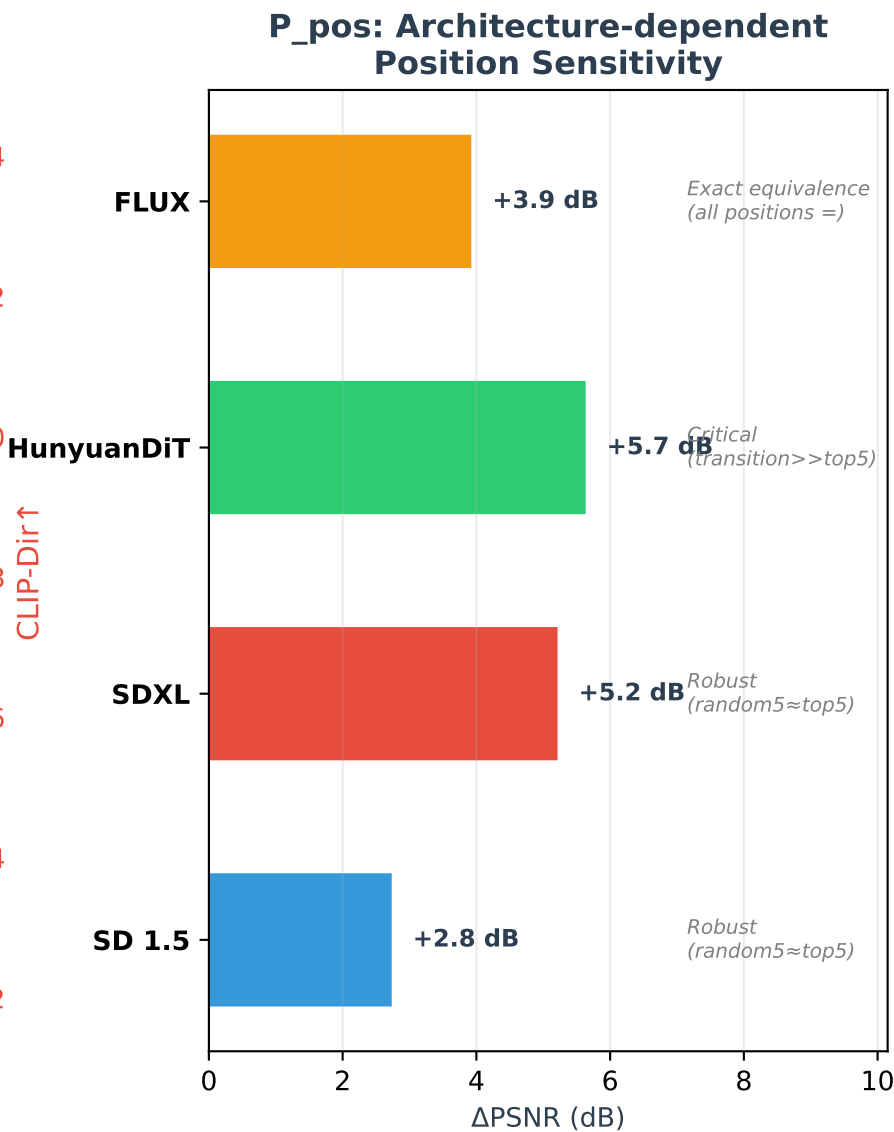

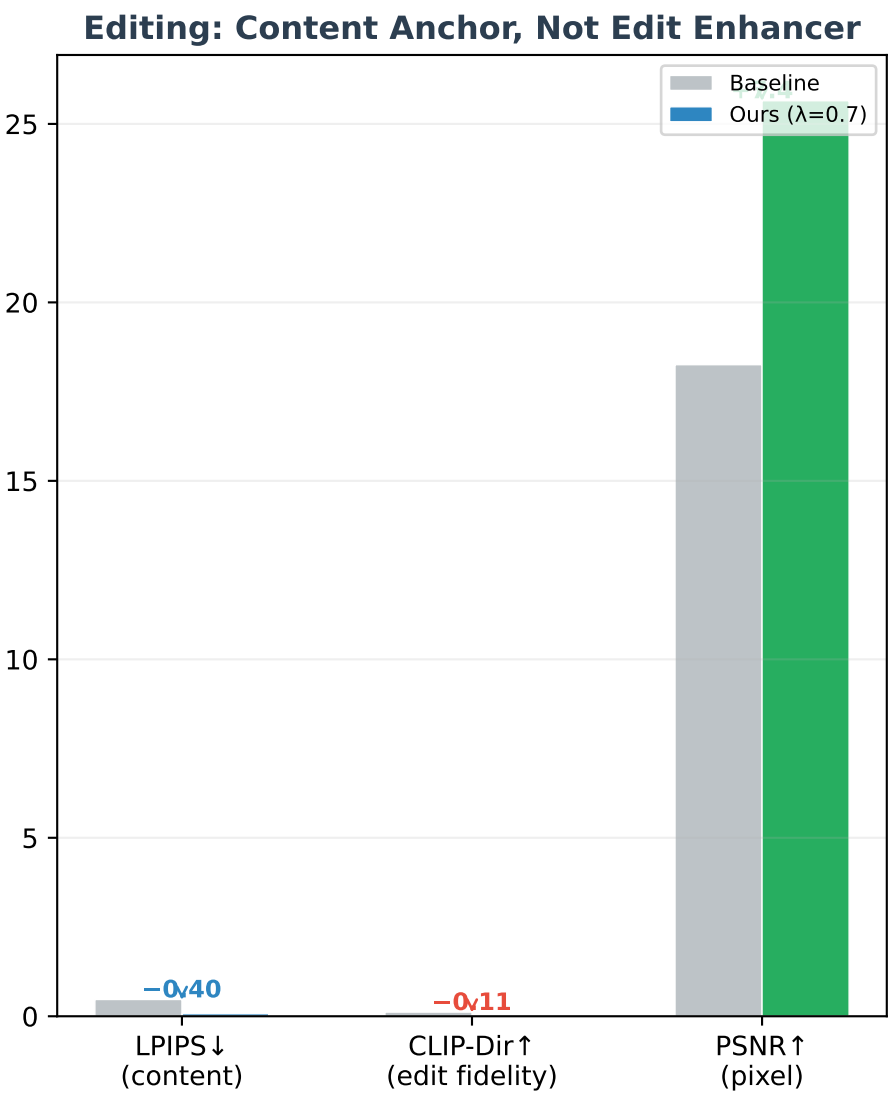

Figure 5: Diagnosis-guided Correction — Simple because Diagnosis is Sufficient

*L-shaped frontier: no  $\lambda$  achieves both plateau-level content preservation AND intact edit fidelity.*

*P<sub>simple</sub>: Feature-level  $\Delta = -0.27$  dB | DCSC no gain | Plan B falsified*

*121 pairs, 104 images. LPIPS -0.4 ( $p=5e-55$ ,  $d=2.6$ )  
CLIP-Dir -0.1 ( $p=1e-29$ ,  $d=1.4$ ) — content preservation at cost of edit fidelity.*
